

KISHAN KUMAR

Gomti Nagar, Lucknow, Uttar Pradesh - 226010

☎ +91-7317629681 ✉ mailkishankumar6@gmail.com [in LinkedIn](#) [GitHub](#)

Summary

Product Engineer with 1.3 years of experience in Java backend development. Hands-on experience in building REST APIs, working with databases, and developing ETL pipelines for data processing. Familiar with basic Machine Learning concepts and their application in real-world use cases.

Education

Kamla Nehru Institute of Technology, Sultanpur

Master's of Computer Application (MCA) : 9.07 CGPA

Nov 2022 – June 2024

Sultanpur , Uttar Pradesh

Deen Dayal Upadhyaya Gorakhpur University

Bachelor's of Computer Application (BCA) : 74.26 %

Aug 2019 – Aug 2022

Gorakhpur , Uttar Pradesh

Technical Skills

Languages: Python, Java, SQL

Frameworks & Tools: Spring Boot, React.js, Node.js, Flask, MongoDB

Cloud & DevOps: AWS, Google Cloud Platform, Jenkins

Tools: GitHub, TortoiseSVN, VS Code, Eclipse

Other: REST APIs, WebSocket (STOMP), JWT Authentication

Experience

Tata Consultancy Services (TCS)

Product Engineer

Jan 2025 – Present

Lucknow, Uttar Pradesh

- Built Java-based backend services and ETL pipelines supporting 10,000+ users with 99.9% uptime.
- Optimized MySQL queries and indexing, reducing execution time by 30%.
- Implemented CI/CD pipelines using Jenkins, automating build and deployment processes.
- Managed version control using TortoiseSVN across a 15+ developer team.

Projects

Streamora – YouTube-Inspired Video Streaming Platform

React.js, Spring Boot, MongoDB, AWS S3, WebSocket (STOMP), JWT, REST APIs

July 2026 – Present

Project Link

- Engineered a full-stack video streaming platform featuring **15+ core features** including JWT authentication, video uploads, subscriptions, comments, likes/dislikes, user profiles, and personalized recommendations.
- Architected and optimized **30+ RESTful APIs** using Spring Boot for authentication, media streaming, search, analytics, notifications, and real-time chat services.
- Implemented **WebSocket (STOMP)** for instant messaging and live notifications while integrating **AWS S3** to securely manage videos, thumbnails, and profile images in cloud storage.
- Integrated **AWS S3** to store **100% of media assets**, including videos, thumbnails, and profile images, replacing local storage with scalable cloud storage.
- Designed a responsive React.js frontend with advanced search, video playback, profile management, and notification center, delivering a seamless cross-device user experience.

NewGen AI Chat Website

React.js, Node.js, MongoDB, API Integration

Dec 2025 – Feb 2026

Project Link

- Developed a full-stack AI chat platform using React.js and Node.js with secure backend APIs.
- Integrated third-party AI APIs to deliver intelligent, context-aware conversations while optimizing RESTful APIs for scalable performance.
- Designed MongoDB schemas for reliable data storage, improving query efficiency and application responsiveness.

Tomato Leaf Prediction

Deep Learning, TensorFlow, CNN, React.js

Dec 2023

Project Link

- Built a CNN-based plant disease classification model achieving **95% accuracy**.
- Developed a React.js interface for image upload and real-time prediction visualization.
- Collaborated in a 4-member team to design and deliver the complete end-to-end solution.

Certification and Badges

Google Cloud Skill Badges (25+) — [Profile Link](#)

AWS Cloud Quest: Cloud Practitioner — [Badge Link](#)

AWS Cloud Quest: Generative AI Practitioner — [Badge Link](#)

Course on Python Google — [Coursera Link](#)

Programming in Java Microsoft — [EDX Link](#)

Achievements

Achieved Global Rank 1 in TCS Global AWS Elevate Days for excellence in AWS architecture and cloud deployment.

Jun 2025 – Jul 2025
